Professional Summary

Software Engineer with hands-on experience designing, developing, and maintaining full-stack web applications using C#, .NET, React, Angular, SQL Server, and PostgreSQL. Experienced in delivering production-ready enterprise features, optimizing backend performance, integrating REST APIs, and contributing within Agile product teams. Microsoft Azure certified with strong interest in scalable backend systems, cloud technologies, clean architecture, and modern web development.

Technical Skills

Languages	C#, JavaScript, TypeScript, SQL
Frontend	React.js, Angular, Razor, HTML5, CSS3, Bootstrap
Backend	.NET, ASP.NET MVC, ASP.NET Core, Entity Framework, REST APIs
Databases	SQL Server, PostgreSQL, MongoDB
Cloud & DevOps	Microsoft Azure, Azure DevOps, CI/CD
Tools & Practices	Agile Methodologies, Kanban, Jira, Postman, Git

Certification

- **Microsoft Certified: Azure Developer Associate (AZ-204)** – Microsoft
- **Microsoft Certified: Azure Administrator Associate (AZ-104)** – Microsoft
- **Web Developer** – Education Ministry of Romania

Professional Experience

.NET Software Developer – Sedona Digital Ltd (Nov 2024 – Present)

- Develop and maintain enterprise full-stack applications using C#, ASP.NET MVC/.NET, SQL, Razor, JavaScript, HTML, and CSS.
- Refactor legacy backend and frontend code to improve maintainability, readability, scalability, and long-term stability.
- Collaborate within Agile workflows including code reviews, feature delivery, troubleshooting, and production support.
- Take ownership of a document generation domain, handling analysis, implementation, maintenance, and support activities.
- Contribute to data-driven business workflows and document processing operations within large-scale enterprise applications.
- Optimize SQL queries and backend processing flows to improve application performance and operational efficiency.

Full-Stack Developer – Freelance (Jul 2024 – Nov 2024)

- Built a booking platform using React.js, Next.js, TypeScript, and PostgreSQL.
- Developed responsive frontend interfaces focused on usability and maintainable component architecture.
- Developed backend APIs and database operations for booking management workflows.
- Integrated automated email notification functionality using EmailJS.

Full-Stack Developer – NetCare International ApS (Dec 2023 – Jul 2024)

- Developed and optimized booking platform functionality using .NET, Angular 15, TypeScript, and SQL.
- Integrated external APIs and improved application flows for better performance and maintainability.
- Contributed to frontend and backend feature delivery in an Agile development environment.
- Gained hands-on exposure to Azure-based deployment and development workflows.

.NET Software Developer Intern – Suvoda Software S.R.L. (Jan 2023 – Jun 2023)

- Worked on hands-on .NET development tasks with focus on C#, ASP.NET MVC, and enterprise software practices.
- Used Git for version control and collaborated within structured development workflows.
- Strengthened understanding of maintainable code structure, debugging, and feature implementation.

Education

Bachelor's Degree in Computer Science and Automation Engineering

"Transylvania" University of Brasov

Oct. 2019 – Jun. 2023

JavaScript Explorer – Bootcamp, Advanced JavaScript

Digital Nation

Sept. 2024 - Nov. 2024

Languages

English – C1 Professional

Romanian – Native

French – A2 Basic

Volunteering

Happy Camps – Cultural Representative & Web Design Trainer

Organized cultural and educational activities for children and introduced students to HTML and CSS fundamentals through interactive workshops.

Personal Projects

Bachelor's Project – Smart Clinic Monitoring Platform

- Developed a full-stack web application using ASP.NET Core MVC (.NET 7), Razor Pages, Entity Framework, and SQL Server for secure and scalable data management.
- Designed and implemented responsive frontend interfaces using HTML5, CSS3, Bootstrap, and JavaScript to improve usability and user interaction.
- Built backend business logic and database workflows for real-time monitoring and automated event handling.
- Integrated Arduino UNO and A9G GPS/GPRS hardware modules to support SMS-based event notification workflows and real-time device communication.

Brasov Central Apartments – React.js, JavaScript, Next.js, PostgreSQL

- Developed a full-stack booking platform with responsive UI, apartment management functionality, and automated email workflows.
- Built frontend components using React.js and JavaScript focused on usability, responsiveness, and clean user experience.
- Developed backend APIs and booking management workflows using Next.js and PostgreSQL.
- Implemented relational database structures for reliable storage and retrieval of booking and apartment data.
